

## 27-300

### Reverse camera input interface

InCarTec

Interface and adapter harness for reverse camera input on original VW head units. The camera feature needs to be activated with VCDS.

#### Compatible vehicles

- Caddy MK IV
- Golf MK VII
- Passat B8
- Sharan MK II
- T6
- Touran MK II

Note, not compatible with head unit models 1K8035150\_  
The head unit model number can be found by accessing the setup menu and looking at the system information option.

Connect the camera input to the yellow phono connector.

3 wires, reverse camera power supply:

- Green - +12V reverse feed
- Red/White - +12V ignition
- Brown - Ground

NOTE: After programming, the radio may need a reset to initiate the new setup, press and hold the power button for 10-15 seconds.
